SUMMARY

Detail-oriented Software Engineer with expertise in the MERN stack (MongoDB, Express.js, React.js, Node.js), API integrations, and scalable application development. Skilled in building user-centric, high-performance web solutions with modern tools like Framer Motion, Redux Toolkit, Tailwind CSS, and Stripe API. Proven ability to deliver quality products through collaboration, problem-solving, and performance optimization. Also experienced in developing and customizing projects using Next.js and WordPress.

EXPERIENCE

■ Associate Software Engineer	Weproms
03/2025 Present Lahore	
<ul style="list-style-type: none">Developed and maintained high-performance MERN and Next.js applications with responsive, scalable designs. Built secure APIs using Express.js and MongoDB, integrating Redux Toolkit for smooth state management and optimized performance. Created reusable UI components with React Bootstrap and Tailwind CSS, ensuring consistency across devices and browsers. Deployed production-ready builds through CI/CD pipelines with Docker for seamless delivery.	
■ MERN Stack Developer (Intern)	IFFA TECH
06/2024 12/2024 Lahore	
<ul style="list-style-type: none">Built a feature-rich eCommerce website platform with secure payments (Stripe), real-time APIs, and role-based access control. Improved cart process efficiency by integrating Google APIs, reducing errors by 25% and cutting processing time by 30%. Followed industry best practices in version control (Git) and API-driven architecture, ensuring maintainable, high-quality code. Enhanced user experience with optimized product search, responsive design, and seamless checkout flow to boost conversion rates.	

PROJECTS

Real State Website
<ul style="list-style-type: none">Developed a dynamic real estate website using the MERN stack with a fully functional admin panel for property management. Implemented secure authentication, property listings, and user dashboards for seamless buying, selling, and renting experiences. Integrated image uploads, search filters, and location-based features using Google Maps API for better user engagement. Built an intuitive admin panel to manage users, properties, and transactions efficiently.Ensured responsive design and optimized performance across devices for a smooth browsing experience.
E-commerce Website
<ul style="list-style-type: none">Developed a full-featured Ecommerce Website using the MERN stack with a modern, responsive UI built in React and Tailwind CSS.Integrated secure payment gateways and user authentication using JWT for a seamless and safe shopping experience.Implemented Redux for efficient state management and optimized API handling for smoother data flow.Enhanced product filtering, cart management, and order tracking functionalities to improve user convenience.Deployed the application on a live server with continuous integration, ensuring scalability and real-time performance.

SKILLS

HTML	CSS	JavaScript	React.js	Redux Toolkit	Material UI	Tailwind CSS	Node.js
Express.js	MongoDB	Next.js	Framer Motion	Git	GitHub	WordPress	Elixir

Certifications

- Mern Stack Development From Datics Ai TechLift ,PaSHA, PSEB
- Elixir Developer internship From InnoBits

EDUCATION

Master Of Computer Science| 2021-2023 The Islamia University of Bahawalpur

Database Systems, DLD, OS, Programming Fundamentals, Data Communication and Networking, Data Structures and Algorithm, OOP, Software Engineering, Web programming, Fundamentals of Theory and Automata, AI, Analysis of Algorithm, MIS, Compiler Construction, Computer Architecture & Assembly, Ecommerce, Computer graphics, DDBMS
